- 29" Fluted 8 groove barrel made to exact Cheytac specifications to optimize projectile performance
- Barreled action may be purchased separate
- Standard M1913 Picatinny rail sight base angled to optimize the nightforce optical sight¹
- Stock of preference is the McMillian A-5 with adjustable cheekpiece and adjustable buttstock
- Options on the M310 Gun include
 - 3 stock repeater using an ADL magazine style
 - Customer's preference on barrel length
 - Any stock at customer's request
 - Special finishes or camouflage patterns
 - Special benchrest models for 1000 yard competition

¹CheyTac suggests the use of the Nightforce 5.5-22x optical sight. The base on the M310 gun is designed to allow the use of the full elevation capability of 100 MOA in the Nightforce scope. We do not use an arbitrary angle of 20 MOA to gain a little range. CheyTac® bases are all designed so that the sights total elevation capability is available to the shooter.
