.22 CALIBER PM16™ CARBINES

NewMatics PM16™
(Select-fire govt. model) or

AiR15™ (semi-auto)

12.5 Inch Barrel (Equal to 14" Firearm Barrel)

Same as the rifle but with a shorter barrel, different muzzle brake, and collapsible stock. The revolutionary PM16 uses precharged nitrogen or compressed air in your choice of standard paintball bottles. The PM16 is a very cost effective and realistic training system.

Spend less, train more, keep your edge.

Specifications

Caliber	.22 cal/5.50mm.
Barrel	12.5" or 16"
Rifling Twist	RH 1:16 Inch.
Muzzle Device	A2 Flash Suppressor
Buttstock	Collapsable or Fixed A2
Extended Length	33.25 Inches
Collapsed Length	30 Inches
Fixed Length, (Rifle)	36.4 Inches
Weight	7-9 Pounds
Working Pressure	1800 PSI
Propellent	Nitrogen or Compressed Air
Pressure Vessel	Standard Paintball Bottles
Modes of Operation	Semi or Full Automatic
Cyclic Rate	900 RPM
Muzzle Energy	9 to 10.8 Foot Pounds
Velocity	525 To 760 FPS

Features

The buffer is premodified so the end user can change from the fixed style buttstock to a collapsable pre-ban CAR stock if so desired. This, combined with the quick change barrel feature allow the airgun to be converted in only minutes to suit any type of training mission requirements.

The gun has been developed to shoot the 5.50mm copper clad lead balls to the same exact point of impact as match pellets so there's no need to re-adjust your sights. It is supprisingly loud for an airgun and this, combined with recoil and high accuracy make it a most exciting airgun to shoot. Re-aquisition of the target in semi mode is virtually the same as an AR-15...control in the full auto mode is similar to the short burst performance of the M-16.

SIMULATORS FOR

LASER SHOT™ SIMULATION

NewMatics has developed a Laser Simulator counterpart to the PM16™{Government Model}Training Rifles. These units feature the same high recoil system as the PM16 .22PCP, allowing for an extremely cost effective and versatile training system. By simply changing the upper half of the PCP or Laser Simulator, the Govt. end user has the option of MILES SYSTEM Training, Laser Sim Screen Training or Live Fire Training. All on one PM16 {Govt. Model} PCP Rifle or Carbine. (Civilian end users cannot have access to MILES, but can have the full auto commercial Laser Sims) .22 PCP Live Fire Training is approximately thirty times cheaper than the firearm and Laser Sims operational costs are near zero. The PM16 is the first system to offer this level of realism and versatility in an extremely cost effective Training Package.
