COPstock™ Recoil Reducing Stocks

Product Jump To...

[Latest News](#) / [New Product Catalog](#) / [Media Info](#) / [Legal Issues](#) / [Test Reports](#) / [Privacy Policy](#)

Designed for Law Enforcement, home defense and sporting applications, the patented Knox COPstock™ Folder folding stock for shotguns cuts actual recoil by over fifty percent.

Using technology developed by Knox Industries for the acclaimed Knox CompStock™, this new folding pistol grip stock takes the pain out of shooting magnum buckshot and slug loads, even with the stock folded. The sturdy folding wire-frame stock is easily folded over the top of the receiver. This allows for compact storage and increased maneuverability in tight spaces, such as vehicles, hallways and entryways.

Extending the stock creates a stable platform for accurate slug or shot placement at maximum ranges. A squeeze of the heavy-duty non-slip soft polymer-coated wire frame releases the lock and allows the stock to be folded open or closed.

The COPstock™ Folder pistol grip contains the unique Knox recoil-reducing mechanism and is covered in a soft rubber

grip sleeve with finger grooves to improve grip and controllability in all weather conditions. The patented recoil-reducing mechanism reduces muzzle flip in addition to taming recoil. Shooters testing the COPstock™ Folder with 3 inch Magnum Buckshot loads have found that there is very little discernible recoil in either open or folded positions, with virtually no muzzle flip.

With the stock folded, the shotgun can be held like a pistol, at arm's length, and fired with no pain or discomfort. Even beginner shooters could consistently hit a 12-inch gong at 25 yards with "00" Buckshot--one-handed! Trying this feat is definitely

not recommended with other folding or pistol grip style stocks.

The Knox COPstock™ Folder is currently shipping for Remington 870 Series and Mossberg 500, 590, Maverick 88, and 835 Series pump shotguns (not compatible with the Mossberg 590DA), and Winchester 1300 Series 12-gauge shotguns.

Suggested retail price is \$109.95 with special pricing for law enforcement agencies and officers. Distributor and Dealer inquiries are invited. Orders are currently being accepted. Call toll-free to **877-GO-KNOXX (877-465-6699)**.

NOTE: The COPstock™ Folder must be used with short or “combat-style” forends. We recommend that the Knox Rubber Overmolded forend (\$19.95) or similar forend be used to avoid interference problems with the stock in folded position.

The Knox Sidewinder™ 10-round Drum Magazine Conversion kit is a perfect addition to the COPstock™ Folder. Knox Industries recommends the MissionReady™ Sling for use with the COPstock™ Folder and all Knox firearms-related products.
