Designed for easy user-installation, the Knox Industries Sidewinder™ Tactical 10-round drum magazine system is perfect for law enforcement, home defense and competitive sporting applications.

[View video of the Knox Sidewinder Tactical in Action](#)

Also available with a 6-round box magazine, the Knox system makes reloading as simple as pushing the magazine release button and swapping magazines.

Changing back and forth between buckshot, slug or less-lethal ammunition can be done quickly and positively.

This unique system, available for most \*Mossberg pump shotguns, is easily installed by simply removing the shotgun barrel and forend, unscrewing the factory magazine tube and replacing it with the Sidewinder assembly and forend. Once the barrel is reinstalled, the gun is ready for use. The drum magazine slips easily into the magazine well and racking the slide delivers the first of ten 12-gauge shells into the chamber. Empty magazines drop free with the push of a button, allowing for a quick 10-round reload in just seconds. No permanent changes are made to the shotgun.

The Sidewinder™ is ideal for SWAT or Special Team entry shotguns, less-than-lethal applications and for IDPA Three Gun Match competitors. Anywhere extended capacity and quick reloads are required, the Sidewinder is the perfect solution. Teamed up with the Knox **COPstock™ recoil-reducing folding stock** and a short barrel, the Sidewinder-equipped shotgun can be the ultimate entry or defense weapon.

The Knox Sidewinder™ Tactical for Mossberg is available as a complete kit with either a 10-round drum or 6-round box magazine. Both magazines accept 2-3/4 and 3-inch shells. Drum and box magazines are also available separately. Suggested retail kit pricing is \$249.95 with one drum magazine or \$199.95 with one box

magazine. Additional drums will be available at \$99.95 each, with the 6-round box magazines at \$49.95. Special pricing for law enforcement agencies and officers is available. Distributor and Dealer inquiries are invited. See our [News](#) page for availability. Call toll-free to **877-GO-KNOXX (877-465-6699)**. Order now as demand is skyrocketing.

*\*The Mossberg version of the Sidewinder will fit the following 12-gauge Mossberg pump shotguns: 500, 500A, Cruiser, Persuader, 590, 590A1, Maverick 88, and most other versions with dual action bars. All Mossberg 590 versions and all 9-shot models will require the purchase of a Knox-supplied adapter (\$19.95) to complete the conversion.*

**Special Note:** We are currently considering a version of the Sidewinder for the popular Remington 870 shotgun. We anticipate that it may be available sometime next year. No pricing or delivery date has been set as yet. This conversion will require the permanent modification of the shotgun. Knox Industries would provide conversion service at our Paso Robles, California facility at a reasonable fee. **Do Not Send Your Shotguns Yet!** If you are interested in a Remington 870 Sidewinder conversion at a projected cost including Gunsmithing and shipping of around \$350, send an email with your name, address, phone and email address to [rem870@knox.com](mailto:rem870@knox.com) and we will keep you on the Remington list. Your input will help us make our decision.

The Knox [COPstock™ Folder](#) is the perfect match for the Sidewinder™ Tactical Kit.
